

## Crown Waterline Features in EQ Version 16.5

### Component Breakdown

New “BOM” (bill of material) breakdown of components offers these advantages:

- Priced at component level (follows Crown’s own internal pricing structure)
- Prices reflect exact components ordered (carcase only / replacement parts)
- No need to reprocess order via Crown’s website
- Attracts the same additional discount as the website
- Tracks component stock

Components are shown as light grey sub-items on the quotation/order screen in EQ as below
