Suitable **for a maximum of 6 consecutive users.**

For more users, consider the **EQ hosted server solution** which provides a full server desktop experience

Server setup: £355 (excl VAT) one off charge

Considerations

An Internet connection is required to access your hosted application.

If using third party **CAD software, email or accounts software** consider that they will not be installed on the same computer as each other. E.g. CAD that could be launched from EQ's customer screen button will not open this way, instead a CAD file can be copied and pasted to EQ's folder. Please ask us for further information relating to your CAD software
