

Safe & Secure

We're proud to share that our eStore has successfully completed another PCI DSS v4.0.1 compliance assessment, the latest version of the standard. This achievement reflects our ongoing commitment to maintaining the highest levels of payment security and meeting the requirements set by the PCI Security Standards Council.

Following the assessment, we implemented secure updates, PCI-compliant payment processing, full-site HTTPS, strong access controls, and regular security monitoring. These measures ensure ongoing protection and compliance for your eCommerce site.

eStore Successfully Passed
PCI Compliance Certification
June 2026/2027

Questions and Further Information

If you have any questions or need further information regarding our PCI compliance or when completing your application for your eCommerce website, please feel free to ask. We are here to provide any additional support.
